# Aerospace Cleanroom Cleaning Applications

SWABS | WIPERS | MOPS

# Helping Aerospace Manufacturers Maintain Cleanroom Environments in Control

## Pass-Through Windows

- **Minimize the risk of external contamination from materials and tools entering cleanroom** by using Teknipure's presaturated wipers with enhanced particle-capturing capabilities
- **Safely transition consumables from room to room with minimal risk of contamination** with Teknipure's double- and triple-bagging packaging options

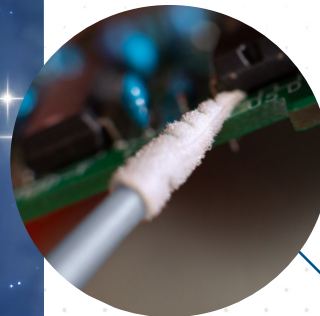

## ESD-Sensitive Areas

- **Reduce the risk of electrostatic discharge in cleaning applications** by using Teknipure's wipers and swabs with ESD properties
- **Minimize the risk of ESD build-up caused by consumables' packaging** when using ESD-safe packaging (Static-Shield bags) from Teknipure

## Gowning Rooms

- **Reduce the risk of contamination from gloves** by using Teknipure's Glove Cleaning Stations with presaturated wipers
- **Minimize contamination in cleanroom entry points** by using Teknipure's wipers and mops with enhanced particle-capturing capabilities

## Precision Cleaning of Small Areas

- **Remove contamination in hard-to-reach small areas and contact points** using Teknipure's cleanroom swabs

## Optics/Lens Cleaning

- **Minimize the risk of micro-scratches** with Teknipure's softer, scratch-free wiper & swab materials
- **Enjoy streak-free cleaning and save time on cleaning** when using Teknipure's microfiber wipers in dry or presaturated options

### Test Equipment & Sensors

- Minimize the risk of mechanical damage with specially designed softer wiper and swab materials from Teknipure

### Labs & Isolators

- Minimize contamination risk inside Isolators with Teknipure's wipers with extra low level of particles, fibers, ions and NVR

### Spill Control

- Achieve faster contamination control in applications with high risk of spills when using Teknipure's wipers and mops with enhanced absorption capacity

### Tool Cleaning & Maintenance

- Minimize the risk of contamination when cleaning rough surfaces - use Teknipure's wipers with enhanced abrasion resistance and minimum risk of particles and fibers break up during use

### WHY TEKNIPURE?

- Industry Experts
- Quick Sampling
- Reliable Supplier
- Custom Product Capabilities

## Contact Teknipure

# Teknipure offers a wide selection of Cleanroom Cleaning Products designed to meet the most stringent requirements in the Aerospace and Defense industries.

All Teknipure products are made in Cleanroom conditions for consistent cleanliness and quality.

## WIPERS

- Extra low level of particles, fibers, ions and Non-Volatile Residue (NVR)
- Soft, scratch-free materials for sensitive surfaces
- Wipers with enhanced particle-capturing and retaining capabilities
- Quick absorbency rate and enhanced sorption capacity
- ESD-safe wiper materials and packaging

## SWABS

- Cleanroom-made using high-precision processes for consistent quality and dimensions
- Thermally bonded to exclude the risk of adhesive contamination
- Ultra-low levels of particles, Non-Volatile Residue (NVR) and ions
- Packaged in silicone-free bags
- Variety of material & handle configurations, including ESD-safe options

## MOPS

- Innovative mop hardware for Isolators, floors and walls
- Mop covers with enhanced particle-capturing and retaining capabilities
- Mop covers with enhanced absorption capacity
- Large-size mop wipes for spill control, equipment covering and tray lining
