CLEANROOM WIPES

Teknipure™

About Teknipure™

Since 2008, Teknipure has been dedicated to delivering

INNOVATIVE CONTAMINATION CONTROL SOLUTIONS

for a broad range of cleanrooms.

Teknipure's products are manufactured with the highest quality standards based on customer, industry, and regulatory requirements. Our contamination removal solutions are designed around our customers' processes to maximize effective and efficient micro-contamination prevention and control.

From precision saturation, to sterilization, to electrostatic dissipative solutions, Teknipure provides application-based contamination control remedies that reduce risk, increase yield, and support clear and consistent cleaning protocols.

INTRODUCING:
Our New Brands

Until you look closely cleanroom wipers look much the same. Most wipers on the market are chosen by their features: material type, edges, and saturation or sterility properties. These features, however, assume that every wiper will wipe any surface, removing any type of debris and yield the same cleanliness results. This is simply not true. Teknipure has done the work to understand how materials interact with surfaces in cleanrooms and provides a wide range of cleaning solutions that deliver efficiency and true cleaning results based on the specific requirements of what and how you need to clean.

To help our customers easily find the wiping solution they need, Teknipure™ is taking a different approach in its product branding. Rather than present you with a dizzying array of acronyms, numbers, and confusing brand names that sound the same, our products are organized around the type of wiping you are doing and the results you need to achieve. Teknipure's unique, understandable, and straightforward branding helps you make the right choice to achieve your objectives.

TekniClean™

Our **TekniClean**™ brand of materials are well-recognized for their high level of purity and ability to perform in critical cleanroom environments.

This family of ultra-clean materials is further broken down according to application:

TekniClean™ EX	TekniClean™ LX	TekniClean™ DX
Our ultra-clean solution for use when wiping water-based fluids	Our ultra-clean, versatile solution for critical cleanrooms	Offers economical contamination control

TekniMax™

The **TekniMax**™ line of engineered wiping materials is developed for superior micro-contamination removal and precision wiping for specialty applications, such as rough and uneven surfaces, dealing with oils and haze, or sensitive applications involving optics.

TekniMax™ EX

The wiper of choice when durable resistance and tough scrubbing are required, as well as when working with fluids

TekniMax™ LX

A more versatile, scratch-free solution to remove fine particles and fluids to oily residues and haze. Also great for crevice and corner cleaning

TekniMax™ DX

The economical choice for removing micro-contamination from smooth surfaces, such as optics, and areas that require frequent cleaning

TekniZorb™

Our **TekniZorb**™ brand of materials is a familiar, well-trusted brand useful in a wide range of wiping applications within controlled environments.

TekniZorb™ LX

A versatile, highly absorbent, low-shedding material for use when working with fluids and environmental cleaning

TekniZorb™ LXS

A pre-wetted wiping option suitable for fast and effective cleaning and sanitizing

TekniZorb™ DX

An excellent, all-purpose, general application wiper for controlled environments

AccuSat™

Studies have established that limited area wetting when wiping results in the inefficient capture of micro-contamination, while an over-application of the wetting solution redeposits solvent contamination and leaves chemical residues on the surface.

AccuSat™ is Teknipure's precision saturation method that delivers controlled and consistent saturation; just the right amount of fluid necessary to dislodge and capture contaminants while leaving near zero residuals behind. AccuSat pre-wetted wipes minimize the chemicals needed to do the job and lowers environmental exposure to VOCs in every application.
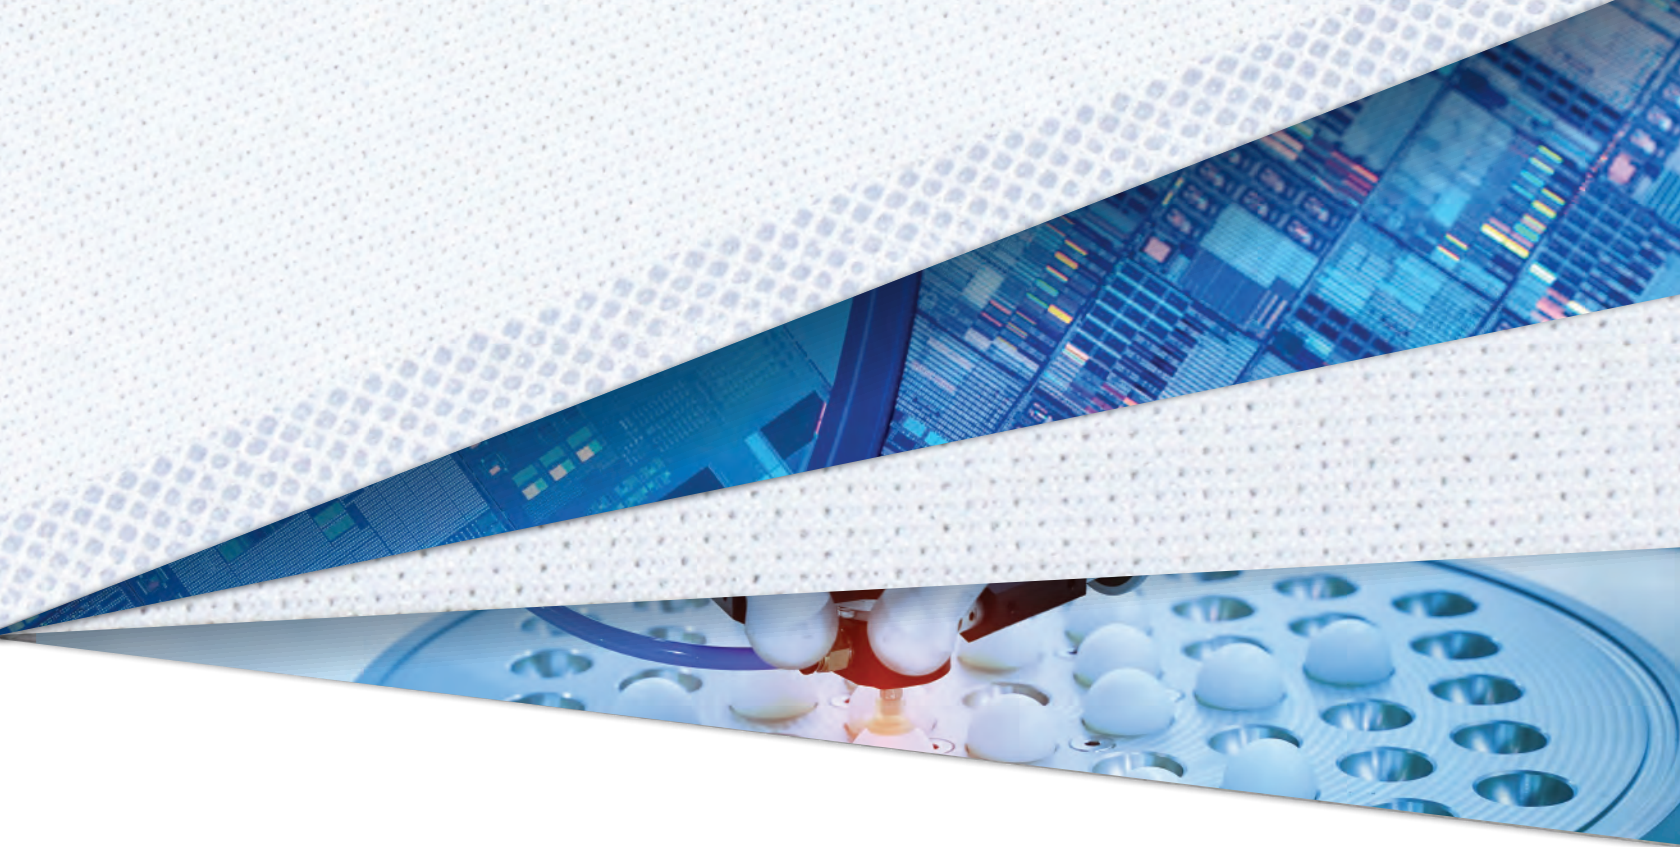

Using the **Right Wiper** for the **Right Job**

Wipers are an essential cleanroom cleaning tool and play an instrumental role in maintaining critical environments in industries such as:

PHARMACEUTICALS • MEDICAL DEVICE MANUFACTURING BIOTECHNOLOGY • SEMICONDUCTORS • MICROELECTRONICS

In order for a cleanroom to sustain its appropriate cleanroom classification, employees must not only follow strict Standard Operating Procedures (SOPs) they must also use the right products that are specifically designed to meet their cleanroom requirements and deliver results in its applications. While cleanroom wipers are typically white, they do not all perform the same. Some are cleaner than others, having less ionic and nonvolatile residue (NVR) present in its fibers; some absorb fluids more effectively, some apply fluids best; some wipe away the finest particles or remove fingerprints most efficiently, while others do not. Choosing the wiper that performs best to achieve the results required will improve contamination control, improve yield through reduced defects, and increase efficiency as the results become easier to accomplish.

STEP 1

Choose the Top 2 types of use that best describe your most important wiping requirements

Example: You are cleaning the inside of equipment in your ISO 3 cleanroom. The surface is very rough and requires scrubbing. You are concerned about chemical residues. You might choose **Tough Jobs** and **Purity** as your top 2 types of use.

STEP 2

Using the star rating system, compare the wipes to find the one or two that are best rated for your types of use

Example: **TekniMax EX** is a clear winner for Tough Jobs and Purity

STEP 3

Teknipure™

TEKNICLEAN™

KNIT POLYESTER WIPES

Ultra-Clean Purity for Critical Environments

TekniClean™ EX
QUILTED POLYESTER WIPES

The Ulta-Clean Solution for Fluid Management

- **TekniClean EX** offers the perfect balance of clean and absorbency. This double-thick, quilted polyester wiper offers layers of absorbent pockets to quickly and cleanly manage fluids in your critical environment

- Processed via a proprietary manufacturing process, these wipers are **Ultra-Clean** to meet the most stringent purity requirements throughout your facility

- Available in cleanliness levels for ISO 3-8 cleanrooms with edge finishes suitable for a wide range of applications

- Specialty packaging options available, including larger wiper sizes

Wiper Size (inches)	Dry	
Suitable for ISO 3+ with Border Sealed Edge Finish		
9 x 9	TC3PB3-99	
Suitable for ISO 4+ with Ultrasonic Edge Finish		
9 x 9	TC2PU3-99	
12 x 12	TC2PU3-12	

Ideal Applications

- Excellent for fluid and spill management in critical environments
- Wiping and applying fluids in processes sensitive to ions/NVR residue
- Useful in applying and absorbing solvents

TekniClean™ LX

KNIT POLYESTER WIPES

The Ultra-Clean Standard for Critical Environment Wiping

- **TekniClean LX** is made via an **Ultra-Clean** proprietary manufacturing process that reduces the potential for shedding while effectively removing ionic and NVR contamination. **Ultra-Clean** purity will meet your requirements for cleanliness throughout your facility

- Available in cleanliness levels for ISO 3-8 cleanrooms with edge finishes suitable in a wide range of applications

- AccuSat pre-wetted with 70% isopropyl alcohol and purified water (UPW)[†]

- Also available in a variety of IPA concentrations (10-100%) and in ESD compliant packaging

- Specialty packaging options available including larger wiper sizes, rolls, and bulk packaging.

Ideal Applications

- Control of ion & NVR contamination
- Working with solvents
- Wiping surfaces with crevices or corners
- General wiping in critical environments (ISO 3-5)

TekniClean™ DX

KNIT POLYESTER WIPES

The Light-Duty Purity Solution

- The light weight solution for purity and economical wiping in controlled environments

- Available in cleanliness levels for ISO 4-8 cleanrooms with both laser-cut and standard edge finishes

- AccuSat pre-wetted with 70% isopropyl alcohol and purified water (UPW)†

- Specialty packaging options available, including larger wiper sizes, rolls, and bulk packaging

Wiper Size (inches)	Dry	AccuSat™ Pre-Wetted †
Suitable for ISO 4+ with Laser Edge Finish		
9 x 9	TC2PL2-99	
Suitable for ISO 5+ with Standard Edge Finish		
9 x 9	TC1PS2-99	TS2PL2I70-99 TS2PL2I70R-99

† TOC <10 ppb and UPW Resistivity >17.8 MΩ

Ideal Applications

- Control of ion & NVR contamination
- Wiping surfaces with crevices or corners
- General wiping in critical environments (ISO 4 and higher)

TekniClean™ LX-ESD

CARBON FIBER EMBEDDED KNIT POLYESTER WIPES

The Ultra-Clean Solution for ESD Sensitive Environments

- **TekniClean LX-ESD** offers an **Ultra-Clean** solution for ESD sensitive environments where static control and purity are essential

- Available in cleanliness levels for ISO 4-8 cleanrooms with laser-cut edge finishes to control fiber shedding

Ideal Applications

- ESD Sensitive Applications where control of ion & NVR contamination is important
- Working with solvents
- General wiping in critical environments (ISO 4 and higher)

Wiper Size (inches)	Dry
Suitable for ISO 4+ with Laser Edge Finish	
9 x 9	TC2PL1-99E

TekniClean™ LX Inspect

BLACK KNIT POLYESTER WIPES

The Ultra-Clean Solution for Visualizing Contamination

- An **Ultra-Clean** solution designed for visual contrast to prove a surface is clean upon inspection

- Available in cleanliness levels ISO 4-8 cleanrooms with laser-cut edge finishes to control fiber shedding

Wiper Size (inches)	Dry
Suitable for ISO 4+ with Laser Edge Finish	
9 x 9	TC2PL1-99BK

Ideal Applications

- Inspecting surfaces for trace contamination
- Inspecting surfaces with crevices or corners

TEKNIMAX™

MICROFIBER WIPES

Engineered Materials for **Precision Wiping Results**

TekniMax™ EX
KNITTED MICROFIBER WIPES

The Tough-Job Solution for Critical Environment Wiping

- Heavy-weight and durable, **TekniMax EX** utilizes a proprietary weaving pattern to create pillowed loops of sweeping power to efficiently wipe away micro-contamination.

- Highly abrasion-resistant fibers and weaving designed for use in the toughest jobs, where scouring off stuck-on debris is required

- Soft enough to use on a range of surfaces

- Available in cleanliness levels for ISO 3-8 cleanrooms with edge finishes designed to contain loose fibers during tough scrubbing

- AccuSat pre-wetted available with 70% isopropyl alcohol and purified water (UPW)[†]

Ideal Applications

- Suitable for heavy-duty jobs that require scrubbing
- Microcontamination removal such as super-fine particles, oily residues or haze, bioburden, etc.
- Excellent when working with fluids

Wiper Size (inches)	Dry	AccuSat™ Pre-Wetted[†]
Suitable for ISO 3+ with Border Sealed Edge Finish		
4 x 4	TC3MFB1-44	
9 x 9	TC3MFB1-99	TS3MFBI70Z-99[†]
Suitable for ISO 4+ with Ultrasonic Edge Finish		
9 x 9	TC2MFU1-99	

[†] TOC <10 ppb and UPW Resistivity >17.8 MΩ

TekniMax™ LX

MIXED-WEAVE MICROFIBER WIPES

The Versatile Microcontamination Solution for Cleanroom Wiping

- Light-weight and conformable, **TekniMax LX** utilizes a mixed weaving pattern to create multi-directional, high surface area contact to thoroughly remove a range of contaminates. From fine, nearly invisible particles and fluids to oily residues and haze, TekniMax LX is the choice to deliver contamination reduction in your cleanroom.

- Will not scratch sensitive surfaces

- Best for cleaning small crevices and hard to clean corners

- Available in cleanliness levels for ISO 3-8 cleanrooms with edge finishes designed to not fray during use

- AccuSat pre-wetted available with 70% isopropyl alcohol and purified water (UPW)[†]

Wiper Size (inches)	Dry	AccuSat™ Pre-Wetted[†]
Suitable for ISO 3+ with Border Sealed Edge Finish		
9 x 9	TC3MBWS-99	TS3MBWI70S-99[‡]
Suitable for ISO 4+ with Ultrasonic Edge Finish		
4 x 4	TC2MFUW-44	
9 x 9	TC2MFUW-99	TS2MWI100Z-99
12 x 12	TC2MFUW-12	

[†] TOC <10 ppb and UPW Resistivity >17.8 MΩ
[‡] Electrostatic dissipative packaging

Ideal Applications

- Delivers streak-free removal of contamination as super-fine particles, oily residues, haze, or bioburden from the most sensitive surfaces
- Working with solvents and other fluids
- Wiping in tight corners or crevices

TekniMax™ DX

NON-WOVEN MICROFIBER WIPES

Quick Clean Solution for Cleanroom Wiping

- Designed for frequent use on transparent or sensitive surfaces, **TekniMax DX** restores cleanliness by removing haze, fine particles, or oily residue build-up in a single swipe.

- Will not scratch or damage sensitive surfaces

- Highly conformable for cleaning small crevices and hard to clean corners

- Available in cleanliness levels for ISO 5-8 cleanrooms with edge finishes designed to contain loose fibers during tough scrubbing

Ideal Applications

- Optics & Sensor Cleaning Polishing surfaces
- Removing oily residues or haze
- For frequent cleaning of small spaces or items

Wiper Size (inches)	Dry	
Suitable for ISO 5+ with Standard Edge Finish		
4 x 4	TZ1MF-44	
9 x 9	TZ1MF-99	
12 x 12	TZ1MF-12	

TEKNIZORB™

NON-WOVEN WIPES

Effective Wiping Solutions for **Controlled Environments**

TekniZorb™ LX
POLY/CELLULOSE WIPES

Absorbent Wipes for Environmental Cleaning

- Versatile, absorbent, and low shedding, **TekniZorb LX** offers the performance needed to restore your controlled environment to its required cleanliness

- Available in cleanliness levels for ISO 5-8 cleanrooms

- AccuSat pre-wetted available with 70% isopropyl alcohol and purified water (UPW)[†] and other concentrations upon request

- Offered in a variety of dispensing types for small and large jobs

Ideal Applications

- Environmental cleaning & sanitizing
- General purpose wiping
- Working with fluids, spill management
- Bench and tray lining

TekniZorb™ LXS

PRE-SATURATED MELTBLOWN POLYPROPYLENE WIPES

Fast & Effective Cleaning and Sanitizing

- **TekniZorb LXS** offers a very low-shedding wiping solution to deposit IPA while effectively removing residue from the surface in your controlled environment

- Available in cleanliness levels for ISO 5-8 cleanrooms

- AccuSat pre-wetted available with 70% isopropyl alcohol and purified water (UPW)[†]

Ideal Applications

- Pass-through wiping and PPE wipe down in gowning area
- Environmental cleaning & sanitizing
- Removal of residues and adhesives

TekniZorb™ DX
LIGHT-DUTY POLY/CELLULOSE WIPES

Light-Duty Wipes for Environmental Cleaning

- **TekniZorb DX** offers an economical solution for light duty wiping needs in controlled environments

- Available in cleanliness levels for ISO 5-8 cleanrooms

- Offered in a variety of dispensing for small and large jobs

Ideal Applications

- Light-duty wiping in ISO 5 and higher cleanrooms
- General Purpose Wiping
- Working with fluids, spill management
