Pharmaceutical Cleanroom Cleaning Applications

SWABS | WIPERS | MOPS

Helping Pharmaceutical Manufacturers Maintain Cleanroom Environments in Control

Residue Removal

- **Effectively remove disinfectant and other residues** - using Teknipure's IPA presaturated wipers with enhanced particle-capturing capabilities

Test Equipment & Touch-screens

- **Minimize the risk of micro-scratches** with specially designed softer, scratch-free microfiber wiper & swab consumables from Teknipure

Spill Control

- **Achieve faster contamination control in applications with high risk of spills** when using Teknipure's wipers and mops with enhanced absorption capacity
- **Easily contain spills** with Teknipure's 2-ply sterile wipers with maximum absorbent characteristics

Pass-Through Windows

- **Minimize the risk of external contamination from materials and tools entering cleanroom** by using Teknisure's IPA presaturated wipers with enhanced particle-capturing capabilities
- **Safely transition consumables from room to room with minimal risk of contamination** with Teknisure's double- and triple-bagging packaging options

Isolators & Sterile Areas

- **Easily reach inside Isolators** by using Teknisure's Isolator Cleaning Tool with individually packaged covers
- **Minimize contamination risk** with Teknisure's sterile wipers and mops with extra low level of particles, fibers, ions and NVR

Gowning Rooms

- **Effectively pre-clean hands and sanitize gloves** using Teknisure Wiper Dispensing System with refillable dry or presaturated wipers
- **Minimize contamination in cleanroom entry points** by using Teknisure's wipers and mops with enhanced particle-capturing capabilities

Why Teknisure?

- **Industry Experts**
- **Reliable Supplier**
- **Quick Sampling**
- **Custom Product Capabilities**

Rough Surfaces

- **Minimize the risk of contamination from consumables** - when using Teknipure's wipers with enhanced abrasion resistance and minimum risk of particles and fibers break up during use

Optics/Lens Cleaning

- **Enjoy scratch-free and streak-free cleaning and save time on cleaning** when using Teknipure's microfiber wipers in dry or presaturated options

Precision Cleaning of Irregular Areas

- **Remove contamination from irregular surfaces and crevices** using Teknipure's cleanroom swabs

Teknipure offers a wide selection of Cleanroom Cleaning Products designed to meet the most stringent requirements in the Pharmaceutical industry.

All Teknipure products are made in Cleanroom conditions for consistent cleanliness and quality.

WIPERS

- Extra low level of particles, fibers, ions and Non-Volatile Residue (NVR)
- Soft, scratch-free materials for sensitive surfaces
- Wipers with enhanced particle-capturing and retaining capabilities
- Quick absorbency rate and enhanced sorption capacity
- Dry and presaturated, sterile and non-sterile options

SWABS

- Cleanroom-made using high-precision processes for consistent quality and dimensions
- Thermally bonded to exclude the risk of adhesive contamination
- Ultra-low levels of particles, Non-Volatile Residue (NVR) and ions
- Variety of material choices for different cleanroom application needs

MOPS

- Innovative mop hardware for Isolators, floors and walls
- Mop covers with enhanced particle-capturing and retaining capabilities
- Mop covers with enhanced absorption capacity
- Large-size mop wipes for spill control, equipment covering and tray lining
