Medical Device Cleanroom Cleaning Applications

SWABS | WIPERS | MOPS

Keeping Contamination Under Control in Medical Device Manufacturing

Why Teknipure?

- Industry Experts
- Quick Sampling
- Reliable Supplier
- Custom Product Capabilities

Adhesive & Residue Removal

- Effectively remove **residues** using Teknipure's IPA presaturated wipers with enhanced particle-capturing capabilities

Scratch-Sensitive Areas

- Remove contamination from **sensors and contact points** using Teknipure's cleanroom swabs made from extra-soft materials

Test Equipment & Touch-screens

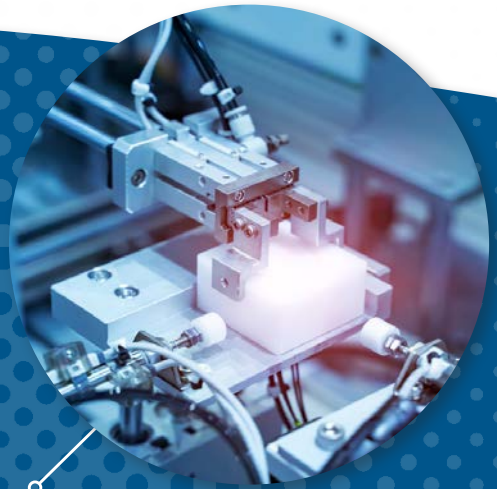

- Minimize the risk of **micro-scratches** with specially designed softer, scratch-free microfiber wiper & swab consumables from Teknipure

Pass-Through Windows & Gowning Rooms

- **Minimize the risk of external contamination from materials and tools entering cleanroom** by using Teknipure's IPA presaturated wipers with enhanced particle-capturing capabilities
- **Effectively pre-clean hands and sanitize gloves** using Teknipure Wiper Dispensing System with refillable dry or presaturated wipers

ESD-Sensitive Areas

- **Reduce the risk of electrostatic discharge in cleaning applications** by using Teknipure's wipers and swabs with ESD properties
- **Minimize the risk of ESD build-up caused by consumables' packaging** when using ESD-safe packaging (Static-Shield bags) from Teknipure

Injection Molding & Metal Machining

- **Effectively remove metal particulates and other micro-contamination** using wipers, swabs and mops with enhanced particle-capturing and retaining capabilities

Rough & Abrasive Surfaces

- **Minimize the risk of contamination from consumables** when using Teknipure's wipers with enhanced abrasion resistance and minimum risk of particles and fibers break up during use

Final Wipe-Down Before Sterilization

- **Minimize the risk of contamination** by using Teknipure's wipers with extra low level of endotoxin, particles, fibers, ions and NVR

Optics/Lens Cleaning

- **Enjoy scratch-free and streak-free cleaning and save time on cleaning** when using Teknipure's microfiber wipers in dry or presaturated options

Teknipure offers a wide selection of Cleanroom Cleaning Products designed to meet the most stringent requirements in the Medical Device industry.

All Teknipure products are made in Cleanroom conditions for consistent cleanliness and quality.

SWABS

Foam Swabs

- Highly absorbent
- Extra-processed for additional cleanliness
- Enhanced particle-capturing

Microdenier over Foam Swabs

- Durable and soft
- Highly absorbent
- Enhanced particle capturing and retaining

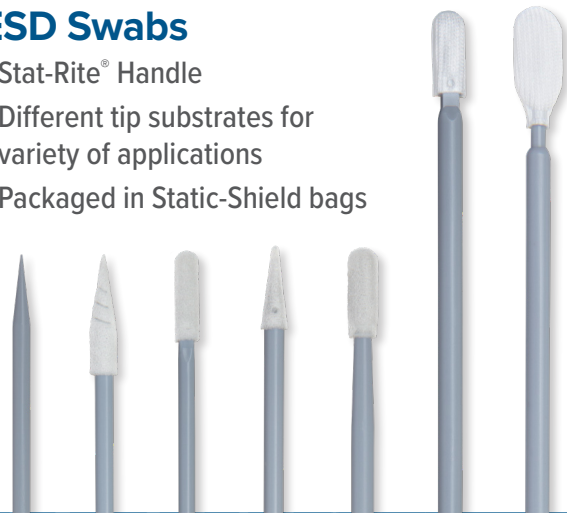

Microfiber Swabs

- Soft and durable
- Streak-free cleaning
- 3x particle capturing and retaining than polyester

ESD Swabs

- Stat-Rite® Handle
- Different tip substrates for variety of applications
- Packaged in Static-Shield bags

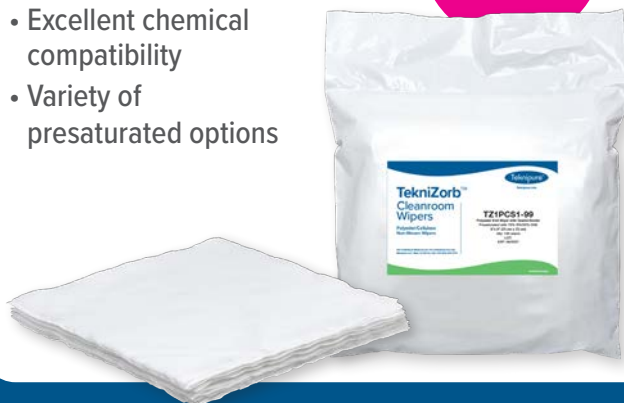

WIPERS

TekniZorb®

Nonwoven Polycell Wipers

- Highly absorbent and durable
- Quick sorption rate under 1 sec
- Excellent chemical compatibility
- Variety of presaturated options

STERILE
AVAILABLE

TekniPolyPro™

Melt-Blown Polypropylene

- Soft and durable
- Great cleaning capabilities
- Variety of presaturated options

STERILE
AVAILABLE

MicroClean™

Microfiber Wiper

- Soft, scratch-free cleaning
- Durable and abrasion resistant
- Excellent particle capturing and retaining

SEALED
EDGE

MOPS

TekniMop™

Carbon Fiber Line

- Extremely lightweight and ergonomic
- Durable and ultra-low-shedding
- Disinfectant & Autoclave safe
- Telescopic handles interchangeable with mop heads
